To All Concerned Parties,

Notice regarding confirmation of a case of COVID-19 coronavirus.

On March 7, one member of our staff currently stationed at Fuji’s head office was tested for COVID-19 coronavirus. This individual, who resides in Nagoya City, was then confirmed to have the virus on March 8.

The staff member in question was present at work until March 5 and is currently in a stable condition while being quarantined at home. This staff member is scheduled to be transferred to a medical facility.

We are planning to perform the necessary steps including sterilization of the required areas under the guidance of the public health center to prevent the spread of the virus.

We are currently taking the following steps.

- Requiring all staff who have been in contact with the infected staff member to remain at home.
- Ventilating the office at regular intervals.
- Sterilizing of work areas
- Notifying all business and other related parties about the confirmation of the virus.
- Refraining from meeting directly with business and other related parties.
- Requiring staff to abide by thorough preventative measures such as correct hand sanitation and wearing masks.

It is important to us that we deliver truthful information and take the right steps to prevent the further spread of this virus. We apologize for any concern that this may cause.

Thank you for your understanding.
