

Fuji Holds Dedication Ceremony for New Okazaki Plant Building

Ready to meet increasing demands in production!
Streamlining production of our newest NXTR series machines

Fuji Corporation (Headquarters: Chiryu City, Aichi Prefecture, President: Joji Isozumi, hereinafter referred to as "Fuji") held a dedication ceremony on September 18, 2024 to mark the completion of its new Okazaki Plant building, at which Fuji will produce its latest flagship model, the NXTR series.

New Okazaki Plant building

The NXTR series is an SMT pick and place machine that is a platform for the FUJI Smart Factory (FSF) concept, and is a cutting-edge model developed for unmanned SMT factories. In recent years, labor shortages and rising labor costs have become serious problems in the manufacturing industry, and the need for factory automation is rapidly increasing. In addition, the electronics market is expected to grow rapidly with the spread of generative AI, and the NXTR series is expected to meet the market needs along with increased demand in the future.

With the establishment of the new factory building, the total floor area of Okazaki Plant will increase to 32,500 m² and its production capacity is expected to be raised to 1.5 times the previous level. The total investment will be approximately 10 billion yen.

We will continue to promote full automation and efficiency for SMT pick and place processes and aim for further growth through our business activities to help realize a sustainable society.

Location	Okazaki, Aichi, Japan
Total cost of construction	Approx. 10 billion yen
Total floor space of Okazaki Plant	Before construction: 8,986 square meters After construction: Increased to 32,500 square meters
Production items	SMT pick and place machines and peripheral units

About Fuji

Company name	FUJI CORPORATION
Representative	Joji Isozumi, Representative Director, President & CEO
Address	19 Chausuyama, Yamamachi, Chiryu, Aichi 472-8686 Japan
Established	April 1959
Business details	Development, manufacturing, and sales of SMT pick and place machines and machine tools
Capital	5,878 million Yen
