

MODEL
T1-02

NEW

It is time to make caregiving easier!!

Natural standing motion

- Simulates the natural trajectory of a motion to stand up
- Allows the care recipient to use their own strength as much as they are able to

Easy operation with simple preparation

- Slings are not required
- Easy to operate

Safe and secure

- Holds individuals in a stable position
- Caters to a wide range of body types

Hug is easy to operate

1 Lean into the Hug

Bring the Hug close to the individual and have them lean into the Hug. There are no slings or harnesses to prepare, so setup time is minimal.

2 Lift torso to stand

Hug is operated with a simple remote controller. It lifts gently, and is safe to use for individuals up to 100 kg.

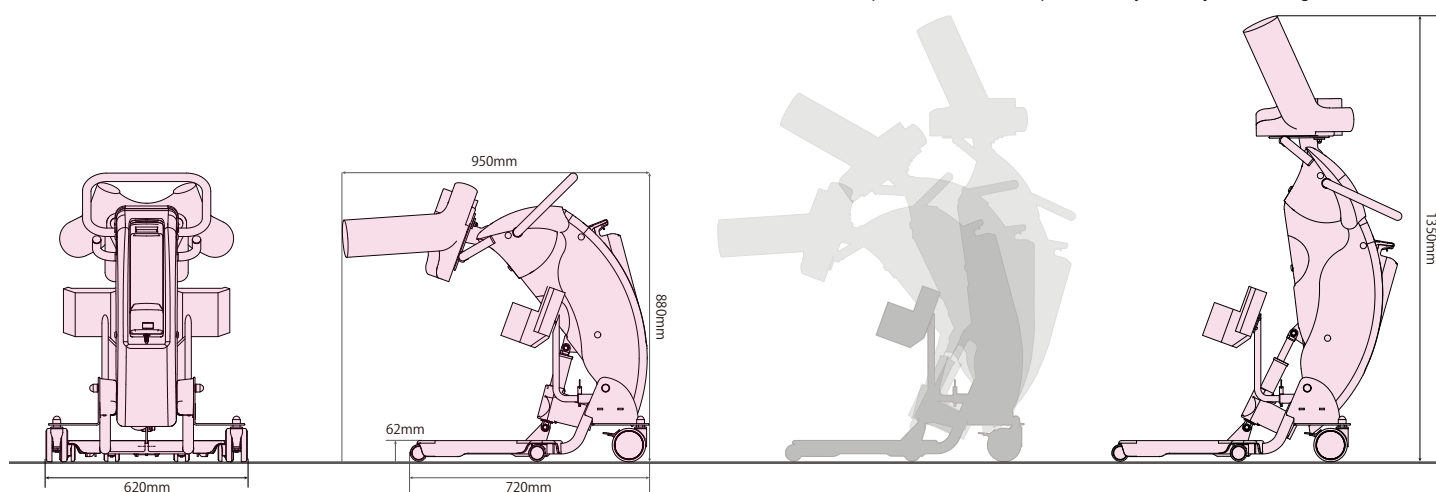

3 Lower to sit

Hug lowers individuals safely into their wheelchair or onto the toilet. It can also be used to assist in changing clothes.
