

Fuji has started accepting orders for four models in the SmartWing SCARA Robot SW-RXS series

Orders for the SmartWing SCARA Robot SW-RXS was started from August 2021

Fuji Corporation (headquarters: Chiryu, Aichi; president and COO: Mr. Shinsuke Suhara; hereafter referred to as "Fuji") has developed four models of SmartWing SCARA Robot SW-RXS as part of the SmartWing SCARA Robot series. Orders for the SmartWing SCARA Robot SW-RXS are being accepted from August 2021.

■SW-RXS6-R70

Development background

SW-RXS has been developed to meet the needs to automate simple manual work, pursuing easy installation and ease of use.

With the expanded product lineup, we can propose a wider range of automation applications through the use of robot packages with peripheral units recommended by Fuji.

Product features

1. Can be installed even in a compact space with its simple and slim construction
2. Our independently developed software, Job Editor, strongly supports your programming work
3. Can support a variety of applications and processes including assembly, transport, and arrangement of parts

Details

Model	Maximum transportable weight	Link length
SW-RXS3-R40	3 kg	400 mm
SW-RXS6-R50	6 kg	500 mm
SW-RXS6-R60	6 kg	600 mm
SW-RXS6-R70	6 kg	700 mm

Future plans

We plan to be able to ship out 175 "SW-RXS" robots in the first year, and increase that to 350 in the following year.

Company profile

Company:	FUJI CORPORATION
Representative:	Shinsuke Suhara, President & COO
Location:	19 Chausuyama Yamamachi, Chiryu, Aichi, Japan 472-8686
Established:	April 1959
Business divisions:	Manufacturing and sales of electronic component mounter robots and machine tools
Capital:	5,878 million yen
URL:	https://www.fuji.co.jp/en/
